6298.0.55.001 - Labour Force Survey Standard Errors, Data Cube, Oct 2009

Summary

About this Release

This spreadsheet allows the calculation of standard errors for estimates from the monthly Labour Force Survey (LFS).

The spreadsheet can be used to calculate the standard errors for the Labour Force Dissemination Region estimates, introduced in the February 2009 release of Labour Force, Australia, detailed - electronic delivery (cat. no. 6291.0.55.001) and Labour Force, Australia, detailed, quarterly (cat. no. 6291.0.55.003). Note: Dissemination regions were backcast to November 2007. For further information see Information Paper: Regional Labour Force Statistics, February 2009 (cat. no. 6262.0).

For information on how to use this spreadsheet see Information paper: Labour Force Survey Standard Errors, 2005 (cat. no. 6298.0).
